- Languages: English (C1 – Advanced), Turkish (Native)

SUMMARY

Data Analyst with nearly a decade of experience supporting clients across diverse industries through data analysis, visualization, and reporting. Specialized in transforming raw data into actionable insights for business, budget, and cost-driven decision-making.

Currently working at Hünerler Tarım, contributing to export cost analysis and operational analytics by calculating product, packaging, logistics, and unit costs to support accurate pricing and sustainable decisions. Alongside this role, I continue freelance analytics work, combining hands-on operational experience with analytical thinking.

User of Python (Pandas, NumPy, Matplotlib) and SQL, with experience in web scraping using BeautifulSoup and Selenium. Certified IBM Data Analyst and Microsoft Power BI Data Analyst, with a strong focus on practical and scalable data solutions.

EXPERIENCE

Hünerler Tarım

Data Analytics & Operations (Export, Budget & Cost Analysis)

Oct 2025 – Present

- Conduct export cost analysis including product, packaging, logistics, and unit cost calculations
- Build pricing and budget support models to enable accurate and sustainable decision-making
